

Quantitative precipitation estimation

- Quantitative precipitation estimation in the Alps: where do we stand?
 U. Germann, G. Galli, M. Boscacci, M. Bolliger, and M. Gabella
 Pages 2-6
- Gauge adjustment of radar-based precipitation estimates in Europe
 U. Gjertsen, M. Šálek, and D. B. Michelson
 Pages 7-11
- Quantitative precipitation estimates from CERAD, BALTRAD and gauges
 F. Rubel, K. Brugger, P. Skomorowski, and M. Kottek
 Pages 12-15
- Operational application of combined radar and raingauges precipitation estimation at the CHMI
 M. Šálek, P. Novak, and D. J. Seo
 Pages 16-20
- A non-parametric methodology to merge raingauges and radar by kriging:
 sensitivity to errors in radar measurements
 C. Velasco-Forero, D. Sempere-Torres, R. Sánchez-Diezma, E. Cassiraga, and J. Gómez-Hernández
 Pages 21-24
- VPR adjustment using a dual CAPPI technique
 I. Holleman
 Pages 25-30
- Correction of attenuated C-band reflectivity fields by means of a variational method
 M. Berenguer, G. W. Lee, D. Sempere-Torres, and I. Zawadzki
 Pages 31-34

Boundary layer, wind and turbulence

- Analysis of three-dimensional wind fields from two operational doppler radars
 Y. K. Goh and A. R. Holt
 Pages 35-40
- Downburst identification using Doppler shear in FMI radar network
 E. Saltikoff, J. Koistinen, and H. Hohti
 Pages 41-44
- Range-velocity ambiguity mitigation via phase coding: experimental results
 J. C. Hubbert, S. Ellis, M. Dixon, and G. Meymaris
 Pages 45-50
- Design and test of a dual-PRT scheme for the French radar network
 P. Tabary, L. Périer, J. Gagneux, and J. Parent-du-Châtelet
 Pages 51-55

Advanced technology

A solution to the range-Doppler dilemma of weather radar measurements by using the SMPRF codes, practical results and a comparison with operational measurements
 J. Pirttilä, M. Lehtinen, A. Huuskonen, and M. Markkanen
 Pages 56-61

Hydrometeor classification methodology for C-band polarimetric radars
 L. Baldini, E. Gorgucci, and V. Chandrasekar
 Pages 62-66

Gaussian model adaptive processing (GMAP) for improved ground clutter cancellation and moment calculation
 A. D. Siggia and R. E. Passarelli, Jr.
 Pages 67-73

Microphysical retrievals of clouds and precipitation

Dynamical, microphysical and radiative properties of ice clouds using Doppler cloud radar measurements
 A. Protat, J. Delanoë, D. Bouniol, and M. Haeffelin
 Pages 74-79

Investigation of rainfall microstructure and variability using vertically pointing radar and disdrometer
 M. Diederich, S. Crewell, C. Simmer, and R. Uijlenhoet
 Pages 80-86

Diagnosis and meteorological phenomena

Quality of echotop products and derived probability of hail as a function of range
 L. Delobbe and I. Holleman
 Pages 87-90

Identification and elimination of overhanging precipitation
 H. Pohjola and J. Koistinen
 Pages 91-93

Mesoscale processes and energetics of fastex secondary cyclogenesis
 C. Heyraud, A. Protat, and Y. Lemaître
 Pages 94-98

The structure and variability of tropical oceanic precipitation in the western Pacific warm pool and eastern Pacific ITCZ
 S. E. Yuter
 Pages 99-104

Advanced networking and multisource methods

Three- and four-dimensional high-resolution national radar mosaic
 J. Zhang, K. Howard, C. Langston, S. Wang, and Y. Qin
 Pages 105-108

Principles of networked weather radar operation at attenuating frequencies
 V. Chandrasekar, S. Lim, N. Bharadwaj, W. Li, D. McLaughlin, V. N. Bringi, and E. Gorgucci
 Pages 109-114

Combining and comparing rainfall observing systems in hydrological modelling of a rural catchment
 G. L. Robbins, M. Grum, and C. G. Collier
 Pages 115-119

Sensor synergy

Synergy between wind profilers and multifrequency microwave radiometers for tropospheric humidity profiling

L. Bianco, D. Cimini, R. Ware, and F. S. Marzano

Pages 120-127

Radar-lidar synergy for space-based retrieval of water cloud parameters

G. May, H. Russchenberg, and O. Krasnov

Pages 128-135

Observing cloud properties with ground-based mm-wavelength radar

A. J. Illingworth and the CloudNET team

Pages 136-138

Observations of the development of the convective boundary layer using radar and Doppler lidar

C. G. Collier and F. Davies

Pages 139-143

Satellite-based radar measurements and applications

Mapping clouds and precipitation with CloudSat and the afternoon A-Train

T. S. L'Ecuyer, G. L. Stephens, and R. T. Austin

Pages 144-149

Preparing GPM: a comparison of radar rainfall measurements in a simulation framework

X. Llort, R. Sánchez-Diezma, and D. Sempere-Torres

Pages 150-154

Assimilation of radar data into NWP models

Assimilation of radar data in the mesoscale NWP-model of DWD

S. Klink

Pages 155-161

Revisiting the latent heat nudging scheme for the rainfall assimilation in convective systems

D. Leuenberger and A. Rossa

Pages 162-167

Quality monitoring of weather radar wind profiles at the Met Office

C. A. Parrett, M. Turp, B. Macpherson, and T. Oakley

Pages 168-173

Impact of a novel de-aliasing strategy on the quality of Doppler radar wind profiles and super-observations used for data assimilation

G. Haase, T. Landelius, and D. B. Michelson

Pages 174-177

Assimilation of Doppler radar observations and its impacts on forecasting of the landfalling typhoon Rusa (2002)

Qingnong Xiao, Y.-H. Kuo, J. Sun, W.-C. Lee, D. M. Barker, and E. Lim

Pages 178-182

Validation/verification of NWP forecasts using radar

Assessment of the RUC10 forecasts of storm initiation during IHOP
R. D. Roberts and J. W. Wilson
Pages 183-187

Comparison of dual Doppler winds with model output of Lokalmodell
J. Handwerker and K. Jellinghaus
Pages 188-192

Radar verification approach to the QPF for local flash flood storms
D. Rezacova and Z. Sokol
Pages 193-196

Quantitative precipitation forecasting and nowcasting

Summary of convective storm initiation and evolution during IHOP
J. W. Wilson and R. D. Roberts
Pages 197-200

Precipitation forecast based on numerical weather prediction models and radar nowcasts
C. Lin, S. Vasić, I. Zawadzki, and B. Turner
Pages 201-205

Nowcasting thunderstorms in the Alpine region using a radar based adaptive thresholding scheme
A. M. Hering, C. Morel, G. Galli, S. Sényesi, P. Ambrosetti, and M. Boscacci
Pages 206-211

Data quality

Radar data quality issues in Northern Europe
E. Saltikoff, U. Gjertsen, D. Michelson, I. Holleman, J. Seltmann, K. Odakivi, A. Huuskonen, H. Hohti, J. Koistinen, H. Pohjola, and G. Haase
Pages 212-215

Impact of combined beam blocking and anomalous propagation correction algorithms on radar data quality
A. Fornasiero, R. Amorati, P. P. Alberoni, L. Ferraris, and A. C. Taramasso
Pages 216-222

Poster Presentations

Spatial characterization and classification of rainfall fields derived from operational c-band weather radar data
F. S. Marzano, G. Vulpiani, P. P. Alberoni, L. Ferraris, L. Provenzale, and N. Rebora
Page 223-229

Searching for rainfall truth: multisensor thunderstorm analysis
Th. Einfalt, M. Jessen, and C. Golz
Pages 230-232

Z-R (Radar Reflectivity-Rain rate) relationships derived from Czech Distrometer data
O. Fišer
Pages 233-236

Determination of cloud top heights using weather radar and satellite data
S. Joro and E. Saltikoff
Pages 237-241

Poster Presentations

An observational study on baiu-frontal-meso-scale convective systems in the leeward side of small island
Y. Umemoto, M. Teshiba, Y. Shibagaki, H. Hashiguchi, M. D. Yamanaka, S. Fukao,
and X-BAIU-99 and -02 observation groups
Pages 242-248

Secondary circulation within a tropical cyclone observed with L-band wind profilers and operational weather radars
M. Teshiba, M. D. Yamanaka, H. Hashiguchi, Y. Shibagaki, Y. Ohno, and S. Fukao
Pages 249-252

In-situ observation and modelling of aggregation of snowfall
P. Senn and E. Barthazy
Pages 253-256

The effect of the discrete nature of rain on weather radar signals
H. Leijnse, R. Uijlenhoet, and H. Russchenberg
Pages 257-260

How do updrafts and embedded convection influence riming?
B. Baschek, R. Schefold, and E. Barthazy
Pages 261-267

The atmospheric radiation measurements millimeter wavelength cloud radars new operational modes
and the new cloud and climate physics value added product
P. Kollias, E. E. Clothiaux, M. A. Miller, K. L. Johnson, K. B. Widener, K. P. Moran, and B. A. Albrecht
Pages 268-271

Radar-disdrometer comparison
K. Do Khac, F. Zanghi, and P. Tabary
Pages 272-277

Retrieving ice precipitation using a radar snow profiling algorithm
E. Moreau, J. Testud, and E. Le Bouar
Pages 278-280

Deriving turbulent kinetic energy dissipation rate within clouds using ground based radar
D. Bouniol, A. Illingworth, and R. Hogan
Pages 281-285

Cloud dynamical, microphysical and radiative properties retrieved from ground based radar/lidar synergy
D. Bouniol, A. Protat, J. Delanoë, and M. Haeffelin
Pages 286-290

Opportunities presented by advanced off-the-shelf signal processing technology
T. Darlington, M. Edwards, J. Sugier, and M. Kitchen
Pages 291-295

Radar observations of stratocumulus compared with in situ aircraft data and simulations
H. Russchenberg, S. Crewell, U. Loehnert, M. Quante, J. Meywerk, H. Klein Baltink, and O. Krasnov
Pages 296-300

On the concurrent use of radar, microwave links and raingauges: results from the Mantissa experiment
C. Capsoni, M. D'Amico, M. Pinotti, and M. Sivelli
Pages 301-304

A multisensor approach to partitioning convective from stratiform echoes
J. J. Gourley, R. A. Maddox, and B. M. Clarke
Pages 305-309

Poster Presentations

Using mesoscale NWP model data to identify radar anomalous propagation events

J. Bech, J. Toda, B. Codina, J. Lorente, and D. Bebbington

Pages 310-314

Study on the extratropical transition of typhoon 0310 (Etau) observed by wind profilers and weather radars

H. Fujita, M. Teshiba, Y. Umemoto, Y. Shibagaki, H. Hashiguchi, M. D.Yamanaka, and S. Fukao

Pages 315-319

Radar system for bird observation

L. Dinevich, Y. Leshem, and O. Sikora

Pages 320-323

Technology of the provision of aviation with radar meteorological information using BUFR code

T. A. Bazlova, N. V. Bocharnikov, and A. S. Solonin

Pages 324-326

Calibration of radar profilers by a rotating corner reflector

D. Klugmann and R. Stephan

Pages 327-329

The influence of vertical effects on the intercomparison of weather radars

N. R. Donaldson and A. Huuskonen

Pages 330-334

Experiments on using the Sun for radar calibration

P. Puhakka, M. Leskinen, and T. Puhakka

Pages 335-340

Analysis of the influence of the stochastic variability of the raindrop size distribution on radar attenuation correction

A. Berne and R. Uijlenhoet

Pages 341-346

Use of a mesoscale model and a radar simulator to analyze the feasibility of x-band radar retrieval algorithms

M. Gosset, E. P. Zahiri, and V. Gouget

Pages 347-351

An implementation of Kalman filter in north-western Italy for radar calibration using 3-hourly gauges measurements and polarimetric c-band radar estimates

R. Cremonini, R. Bechini, V. Campana, D. Rabuffetti, and I. Giudici

Pages 352-355

Weather dependent training and large sample evaluation of quantitative precipitation estimation by radar

M. Gabella, M. Bolliger, G. Galli, U. Germann, A. Rossa, and G. Perona

Pages 356-362

The use of radar and gauge accumulation datasets for the derivation of daily tuned Z-R relationship

Yu. Pavlyukov

Pages 363-367

Improvements in weather radar rain rate estimates at the ground using a methodology to identify the vertical profile of reflectivity from volume radar scans

M. Franco, D. Sempere Torres, R. Sanchez-Diezma, and H. Andrieu

Pages 368-373

The effects of vertical air motions on radar estimates of rainfall

J. J. Gourley and N. Dotzek

Pages 374-378

Poster Presentations

C. Guéguen and P. Tabary
Comparison of two VPR identification methods
Pages 379-385

G. Vulpiani, E. Picciotti, G. Ferrauto, F. S. Marzano, and V. Chandrasekar
C-band dual polarization radar retrieval of rainfall: application of an iterative technique with embedded neural-network
Pages 386-392

R. Cremonini, R. Bechini, P. P. Alberoni, and M. Celano
Which hydrometeor classification scheme is realistic using ZH, ZDR and temperature in complex orography?
A study based on operational C-band polarimetric weather radar in northern Italy
Pages 393-397

J. M Lynch, R. W Scovell, and A. H Smith
Getting more value from the UK weather radar network
Pages 398-401

A. Wagner, M. Clemens, and J. Seltmann
Vertical profile of drop size spectra
Pages 402-406

D. Moisseev, C. Unal, H. Russchenberg, and V. Chandrasekar
Radar observations of snow above the melting layer
Pages 407-411

D. Moisseev, C. Unal, H. Russchenberg, and V. Chandrasekar
Dual polarization spectral retrievals of the effective raindrop shapes
Pages 412-415

J. Bech, E. Vilaclara, N. Pineda, T. Rigo, J. López, F. O'Hora, J. Lorente, D. Sempere, and F. X. Fàbregas
The weather radar network of the Catalan Meteorological Service: description and applications
Pages 416-420

J. Parent-du-Châtelet, J. Testud, H. Andrieu, and P. Tabary
A first dual polarization weather radar in the french network: test of its usefulness for hydrology
Pages 421-424

S. Hafner, R. Reitter, and J. Seltmann
Developments in the DWD radarnetwork
Pages 425-427

G. Ferrauto, F. S. Marzano, and G. Vulpiani
Model-based sensitivity analysis of incoherent effects on microwave radar observations of precipitation media
Pages 428-434

C. Golz, T. Einfalt, and M. Jessen
Radar data quality control procedures
Pages 435-437

J. Koistinen and H. Pohjola
Diagnosis of precipitation detection range
Pages 438-439

P. Lamarque, P. Tabary, J. Desplat, K. Do Khac, F. Eideliman, and J. Parent-du-Châtelet
Improvement of the French radar rainfall accumulation product
Pages 440-443

Poster Presentations

Nowcasting of precipitation by using radar and NWP model data

Z. Sokol, D. Rezacova, and P. Pesice

Pages 444-449

Predictability of precipitation from continental radar images – a scale- and location-dependent benchmark to evaluate model forecasts

U. Germann and I. Zawadzki

Pages 450-453

Optical flow in radar images

M. Peura and H. Hohti

Pages 454-458

Czech weather radar data utilization for precipitation nowcasting

P. Novák

Pages 459-463

Convective storm initiation in central Catalonia

R. Pascual, A. Callado, and M. Berenguer

Pages 464-468

The fit of Doppler radar radial winds with the NWP model counterpart

K. Salonen and H. Järvinen

Pages 469-473

A radar observation operator for high-resolution non-hydrostatic numerical weather prevision

O. Caumont, V. Ducrocq, G. Delrieu, M. Gosset, J. Parent du Châtelet, J.-P. Pinty, H. Andrieu, Y. Lemaître, and G. Scialom

Pages 474-480

Application of Latent Heat Nudging in Aladin model

G. Gregorič, J. Jerman, N. Pristov, A. Zgonc, and J. Cedilnik

Pages 481-482

Assimilation of the radar rainfall data using latent heat nudging technique

B. Jakubiak

Pages 483-486

On the assimilation of Doppler radial winds into a high resolution NWP model

F. A. Rihan, C. G. Collier, S. P. Ballard, and S. J. Swarbrick

Pages 487-493

A polarimetric radar forward operator

M. Pfeifer, G. Craig, M. Hagen, and C. Keil

Pages 494-498

Assimilation of radar reflectivity data for triggering of convective phenomena

A. Horvath and K. Csirmaz

Pages 499-501

Weather situation-dependent stratification of radar-based precipitation verification of the Alpine Model (aLMo)

A. M. Rossa, M. Arpagaus, and E. Zala

Pages 502-508

Some examples on the use of radar observations for the verification of NWP models in the Alpine region

M. Gabella, V. Calvia, and G. Perona

Pages 509-515

Poster Presentations

Utilization of radar-based precipitation estimates in hydrological models in the Czech Republic
M. Šálek and L. Březková
Pages 516-521

Combining NWP data, radar data, raingauge data and a hydrological-hydrodynamical model for flood forecasting in Turkey
Th. Einfalt, T. S. Jensen, and A. Klinting
Pages 522-524

The HydroMet Decision Support System: new applications in hydrology
J. W. Conway and M. D. Eilts
Pages 525-527

Effects of radar data improvements on hydrological modelling
K. Osrodka, A. Jurczyk, and J. Szturc
Pages 528-530

Optimal channel selection and validation for a combined CloudSat-MODIS ice cloud property retrieval scheme
S. J. Cooper, T. S. L'Ecuier, P. Gabriel, and G. L. Stephens
Pages 531-536

Time varying properties of convective systems in the Great Lakes region of North America
D. Hudak, S. Boodoo, and N. Donaldson
Pages 537-540

Morphological description of the rain structures in the Padana valley
C. Capsoni and M. D'Amico
Pages 541-544

Optimisation of spaceborne cloud profiling radar vertical and radiometric resolution requirements for resolving highly layered cloud structures
C. Tinel, C.-C. Lin, J. Testud, F. Ferreira, K. Caillault, and E. Caubet
Pages 545-549

Radar Visualization in the NinJo Project
P. Joe and M. Falla
pages 550-555
